Dear Dan:

We would like to thank you for doing such a good job installing the drainage system under our house.

Even though our house is only two years old, the way the contractors in this subdivision graded the lots we did have some water issues. The thought of getting mold under our house was scary. When you did your initial inspection, you found the precursor to a possible mold contamination. We don't have to worry about that now since you installed your drainage system.

You and your staff are to be commended on doing such a fine job not only during the installation but also in your cleanup. We are completely happy and would recommend your company to anyone who is thinking about having a drainage system installed in their house.

Very truly yours,

Richard and Dorothy Frey
