

I cannot begin to say enough good things about Dan and his team. We were in the process of selling our home and found in the inspection that we had water in our crawl space. We were set to close in 2 weeks and we were extremely worried that we would not be able to remedy this problem in time. With the added stress of our water issue, we were so very fortunate to have D & R come and handle it. We felt like Dan and Chad were very honest and forthcoming. In a very unfortunate situation, we always felt like we were in good hands with D & R Drainage Systems. We completely trust Dan and will absolutely recommend him and his team to anyone that is experiencing water issues. He is the best....hands down!
